YOSHIKI TAKAYA
高屋良樹

Story thus far

Shou and the others invited journalists Asou and Tokiwadaira, whom they met in Shinjuku. Reflecting on the current situation and with some harsh words from Asou, Shou's resolution was renewed. Elsewhere an incident has taken place on board the orbiting giant Cronos bioship "Ark". The mysterious masked man, known as Apollon, broke in and stole not only the three Zoacrystals of the fallen Zoalords but Lord Caerleon's as well. What is Apollon's goal in stealing the Zoacrystals and challenging Barcas and the remaining commanders?
A few days later, a lone woman landed at Narita International Airport and was welcomed as inspector Valkyria. With an invincible smile, she let out the word "Adapt" and bio-boosted! The new biobooster, enemy of Cronos. She is Guyver II F!!

Chapter 168
Cage of Carnage

Cast of Characters

Fukamachi Shou

Currently the greatest enemy of the conquered world, the main protagonist that battles Chronos. Bio-boosting into Guyver I, and also the Enhanced Weapon System Gigantic, battles great evil.

Makishima Agito

Bio-boosts into Guyver III. Although he was a candidate for Chronos' next management, rebelled to fulfill his own ambition. Organized the American Resistance "Zeus' Thunderbolt".

Segawa Mizuki

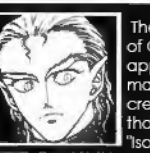
Childhood friend of Shou. At first admired Agito, but, facing a severe situation, stands with Shou, and loves him. Exists as the place where Shou's heart resides.

Onuma Shizu

A girl who gives her body to the ambition of Agito. Became the Zoalord "Griselda" to lead the processed "Libertus" of the resistance.

Segawa Tetsuro

Brother of Mizuki, and acts as a brother to Shou. Getting involved in the incident with Shou, learned the existence of Chronos. Supports Shou with his research.

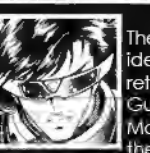


Archanfel

The Supreme Commander of Chronos that has an appearance of a young man. Was the first Zoalord created by the "Advents" thousands of years ago. An "Isolated Super King" that has immense power in his body.

Aptom

As a result of numerous reprocessing, has evolved into a "Battle Creature" different from a Zoanoid. Free from the mental command of a Zoalord, he moves according to his own will.



Imakarum Mirabilis

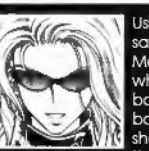
The 13th Zoalord. His true identity, recieving the retrieved Zoa Crystal of Guyot, is Murakami Masaki who has recieved the will of Alchanfel.

Alfred Heckering

An old Scientist that has co-operated with the resistance "Zeus' Thunderbolt". Was also the No. 2 in Chronos Research. Created the Libertus and Griselda, also carries the Physical Control.

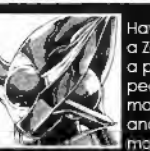
Hamilcar Barcas

Oldest among the 12 Holy Commanders and the highest regarding in Zoanoid Processing. Was also involved in the processing of the other Zoalord Members. A strange old man that can control Zoanoids with his strong psychic waves.



Valkyria

Using the Bio-boost cell sample and artificial Control Metal, a former inspector who has become a bio-booster herself. Turning her back on the organization, she is a mysterious woman that calls herself Guyver II F (Female Guyver II).



Apollon

Having the same abilities as a Zoalord, identity unknown, a person who appears unexpectedly at unexpected moments. His special armor and cape covers his body, moves secretly in taking the Zoa Crystals.

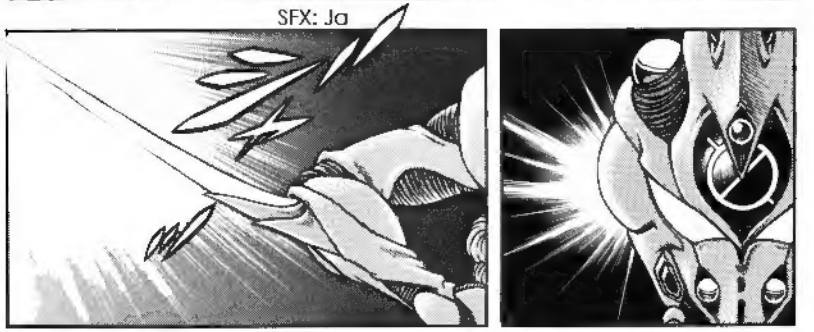
It is unfortunate but we cannot let you run free.
Inspector Valkyria .... no,
"Guyver II F"

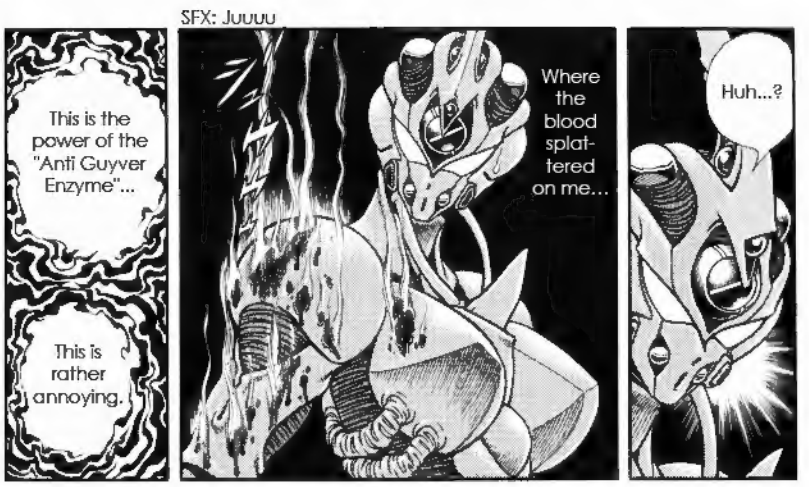
SFX: Za

Get her!

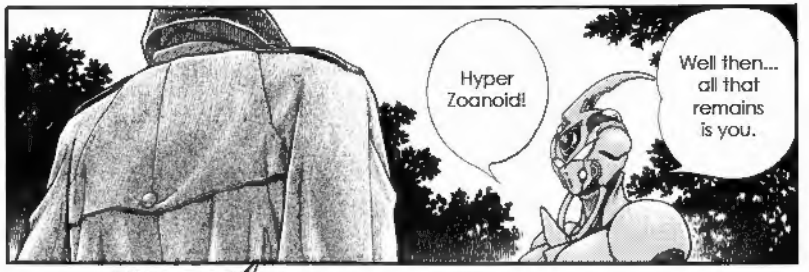
SFX: Ja



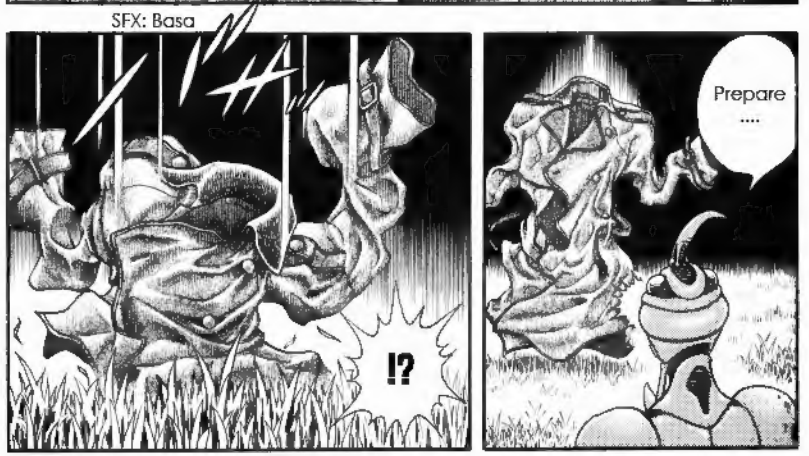
GOOOOOU!
GIKI
SFX: Da
SFX: Zau
SFX: Bishu



SFX: Juuuu
This is the power of the "Anti Guyver Enzyme"...
This is rather annoying.
Where the blood splattered on me...
Huh...?



Hyper Zoanoid!
Well then... all that remains is you.



SFX: Basa
!?
Prepare ....

SFX: Ta
SFX: Baba
Guyver Advocacy

And you plan to defeat me with that?
Oh...?
Even if you have the Guyver's "Head Sensor"
You cannot detect me.
Taking you down is "their" job.
My abilities are not only "Screening"...
Besides ...

Kuh...
!?

But this much...
I heard that the Enzyme III was tough...
Especially... these E-III's, strictly speaking, are no longer Zoanoids.
Hehehe....
the Enzyme series was an artificial creation introduced as the "Guyver's Natural Enemy".
Even heavy battle damage completely heals in seconds.
In exchange for their life span, their metabolism has been enhanced.

When needed they are "thawed" for the mission
Ordinarily, they are on standby, not taken out of the processing chamber.
to follow the program they receive and completely obliterate their target
There is only one thing that they think of ..
They have no ego, no feelings.
and no fear of "Death"
"Guyver"!!
The target that is called.....

It doesn't matter what you say
However you too are the same, Hyper Zoanoid
In other words, "Disposable Tools"
Heh...
Well then, "Round 2" starts!

SFX: Jooooo
I'm at a real disadvantage.. huh.
SFX Shaaaa

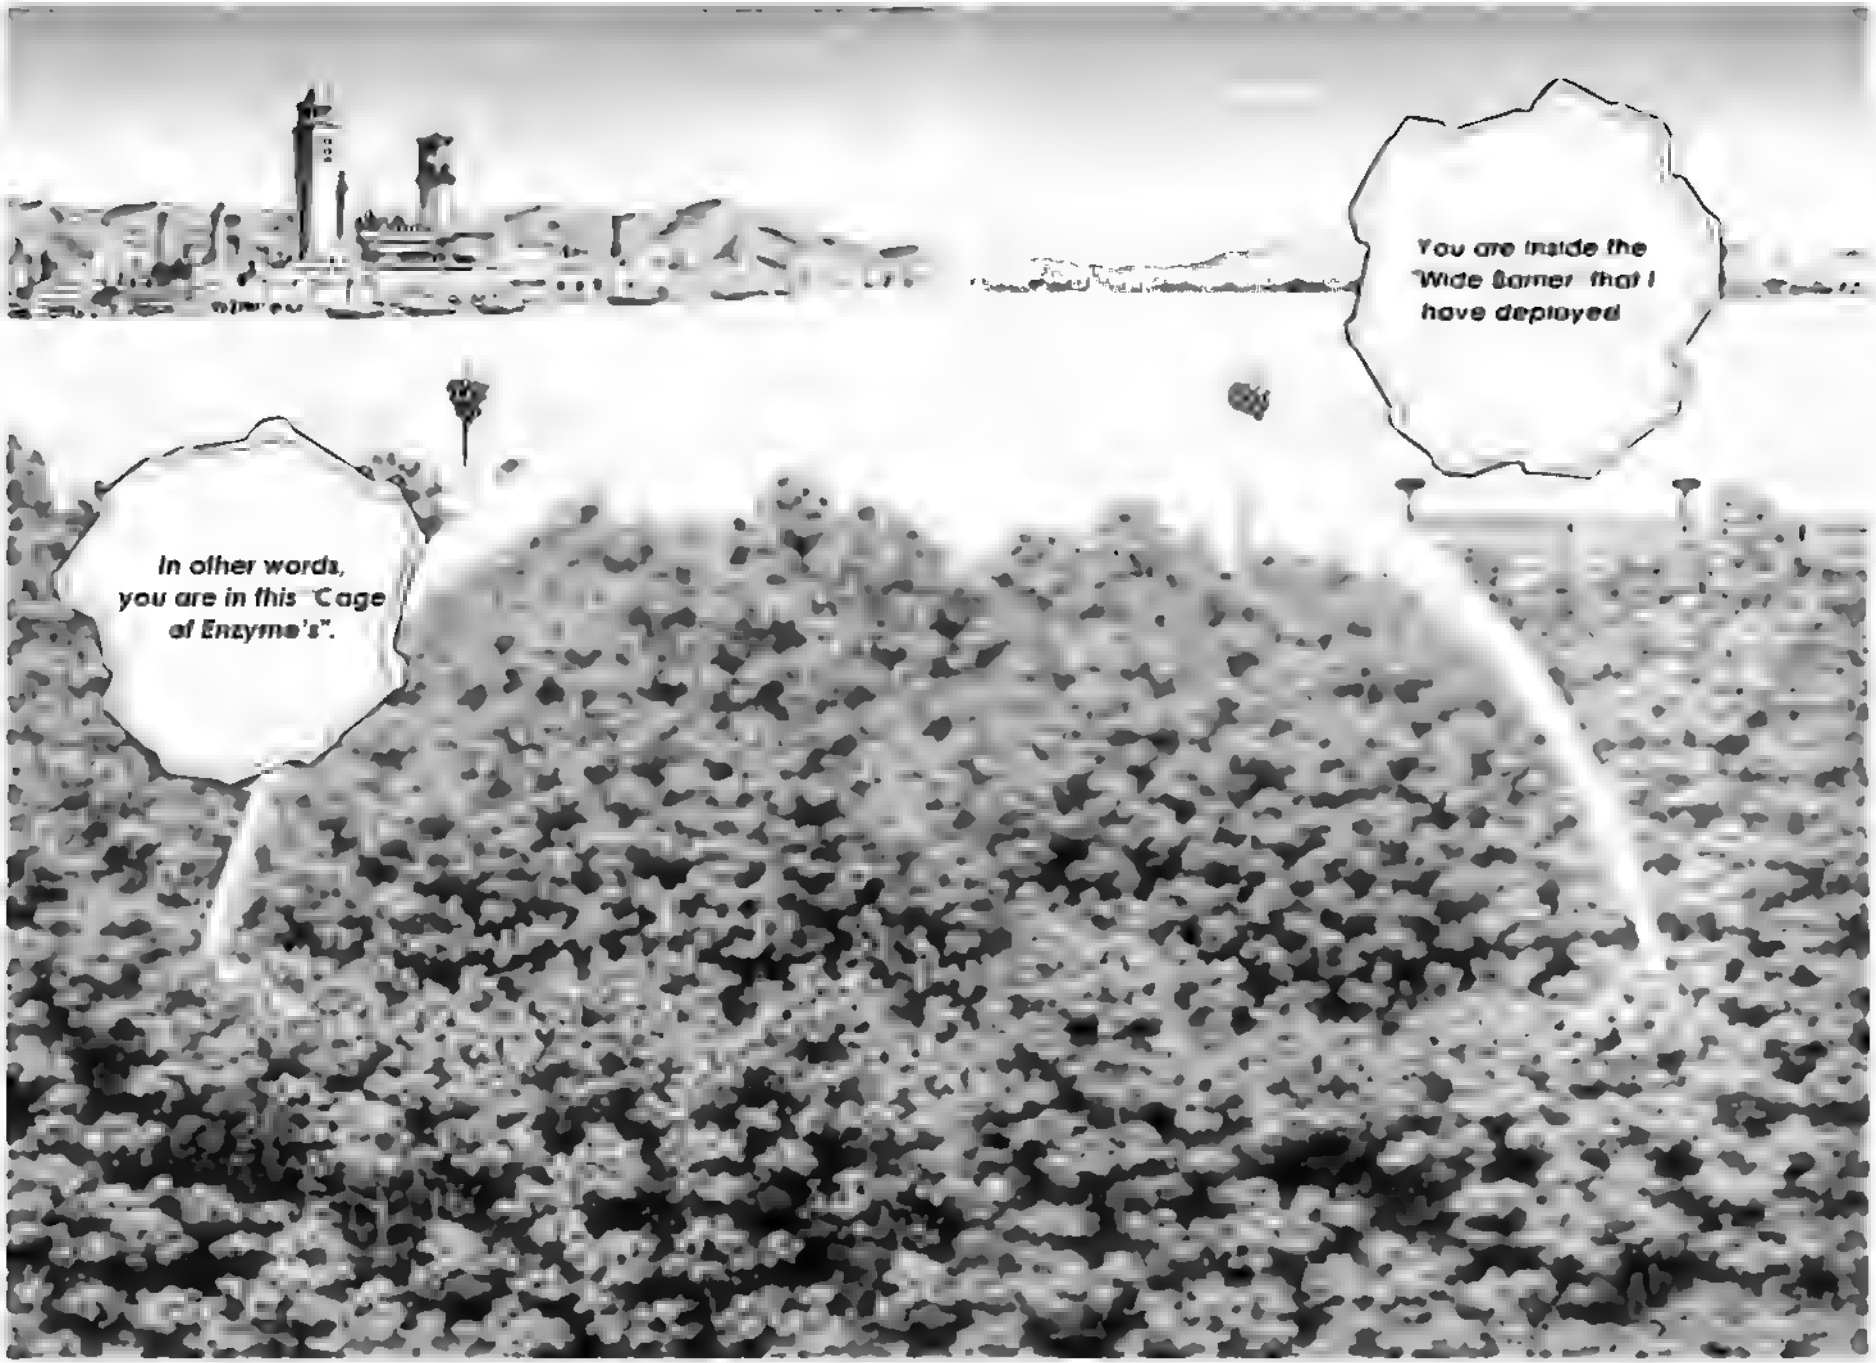
SFX. Bachi
SFX. H
!?



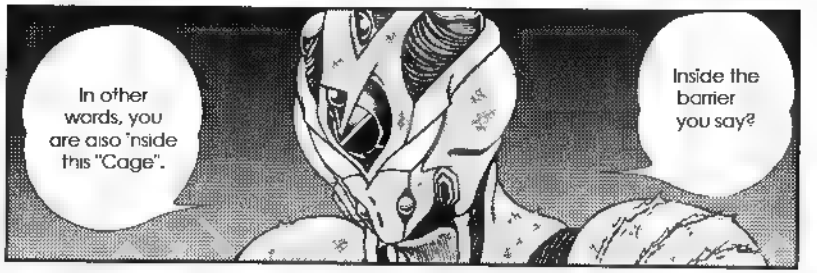
You are inside the "Wide Barrier" that I have deployed
In other words, you are in this "Cage of Enzyme's".

Can you do it?
Hahaha, you sure are a piece of work.
Kill me?

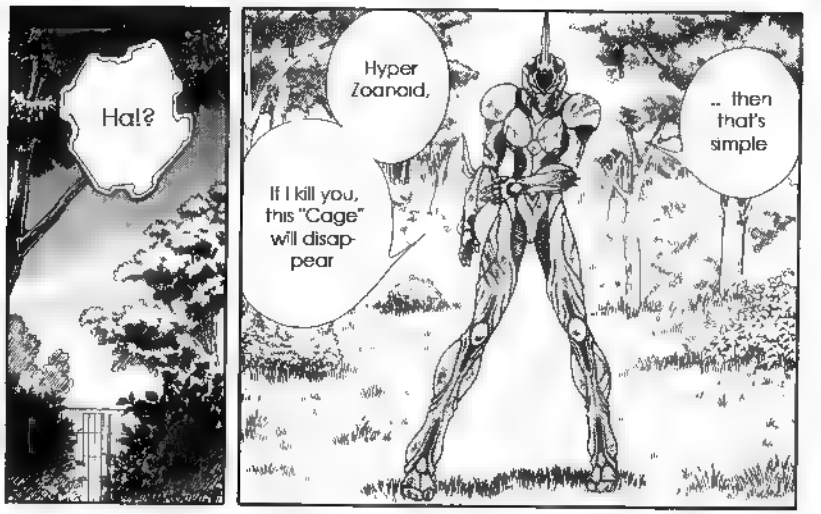
I have no reason to fall here.
I can.
Also

I can't possibly reach my target
If I cannot overcome this degree of obstacles,

.....
Have you realized your situation, Inspector?
Don't you see.. there is no escape.



In other words, you are also inside this "Cage".
Inside the barrier you say?



Ha!?
Hyper Zoanoid,
If I kill you, this "Cage" will disappear
.. then that's simple

The Guyver's "Pressure Cannon" is indeed a frightening weapon
But without enough charge a "low destructive version", would not be able to harm them.
Without time to charge, neither the full-power Pressure Cannon or the "Strongest Weapon" Mega smasher ..
Also

The legs of Enzyme III ..?

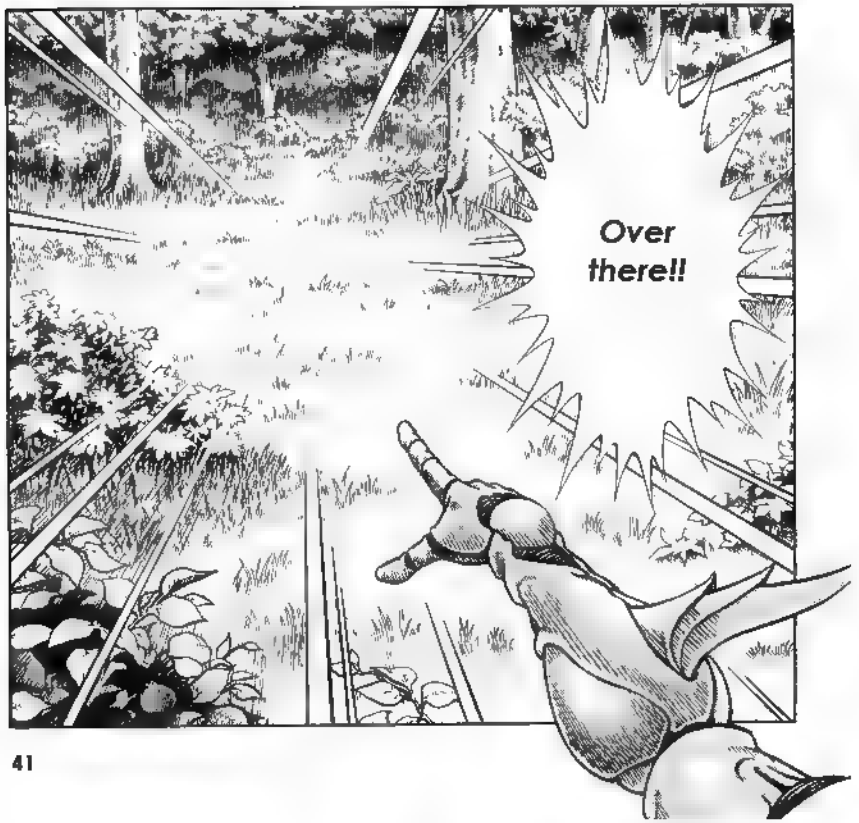
There is something
in that short time...
Again with that "Pressure Cannon"
What?

In order to flush out your location!
Hyper Zoanoid!



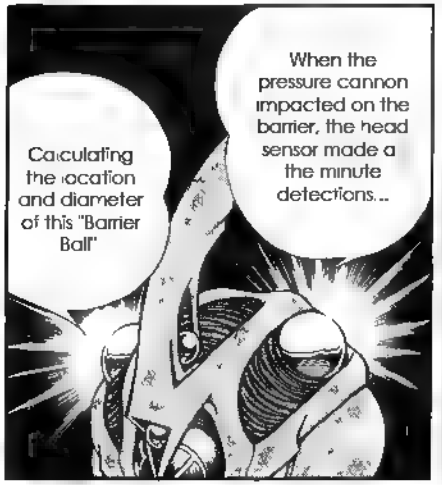
Over there!!

What were you thinking?
both shots missed?

....
Also, my charge at the barrier already caused damage
The head beam cannot reach the insides of the barrier because of the trees.

You couldn't have

Heh... Do you think that I would stupidly waste a low powered pressure cannon?



When the pressure cannon impacted on the barrier, the head sensor made a the minute detections...

Aside from Shou and Agito Makishima,
There is another "Bio-booster" . huh
But this is surprising
I was a bit worried when the Enzymes started to move out from Cloud Gate .
And she's suitably skilled...
Although I helped at the last moment.
Even so.

this.
With this outbreak of
repeated incidents,
Cronos is heavily
shaken
Jabir Ibn
Hayyan
Don't

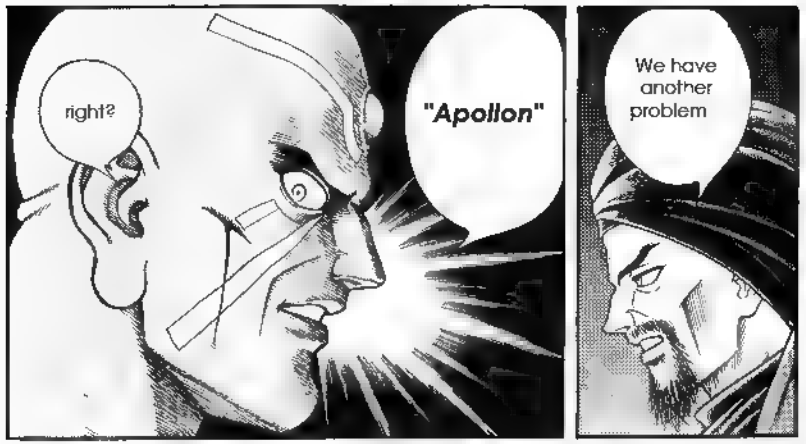
like that



right?
"Apollon"
We have another problem

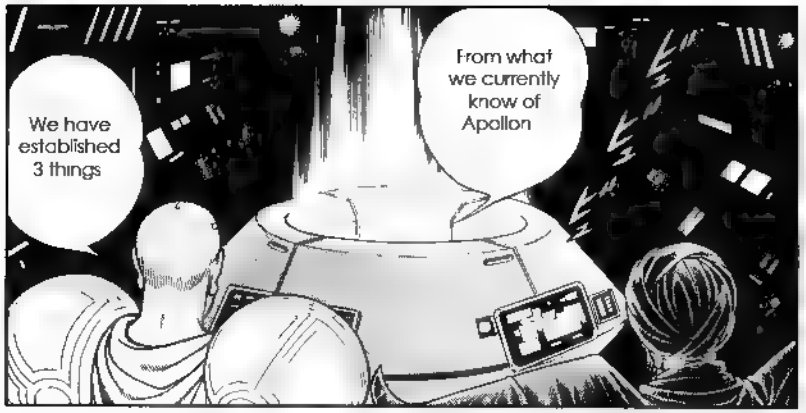
As I have heard
That's right

This person managed to steal the 3 "Zoa Crystals" of Purgstall and the others aboard the orbiting "Ark"
Carleon who was guarding them also had his Crystal taken...

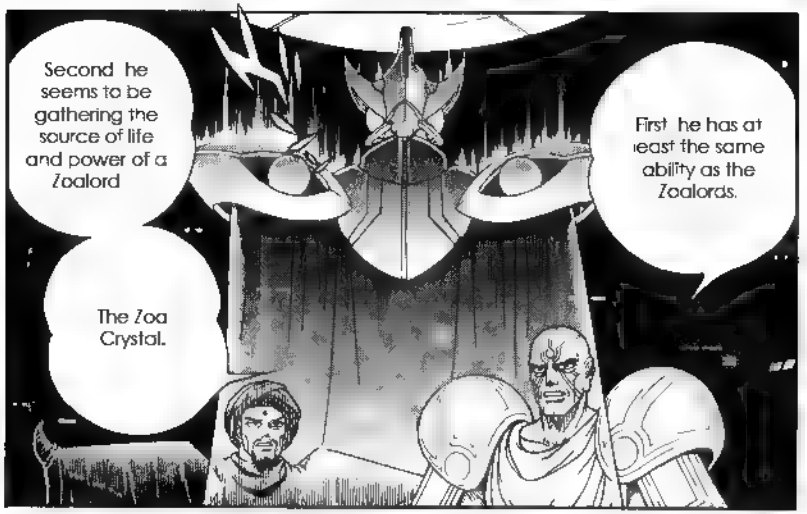
The Enzyme III patrol that welcomed her in Narita,
Aah
under the leadership of a Hyper Zoanoid, has been crushed
Speaking of which, the "Female Guyver" that went out of control in Washington

Hmm.
Once more, they underesti mated her.
like she has now appeared in Japan

However
SFX. Vushi
Such impressive battle prowess.
Certainly as expected of a former Cronos Inspector

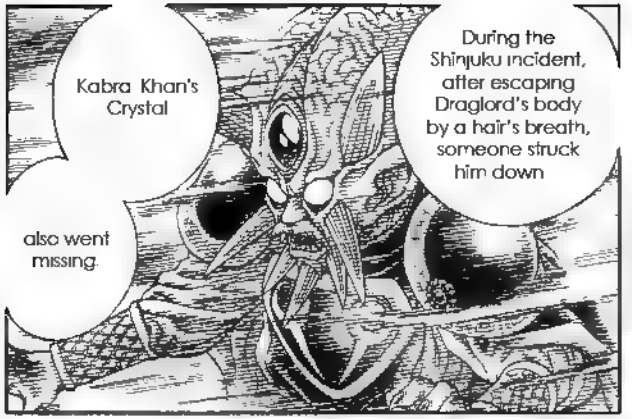


We have established 3 things
From what we currently know of Apollon



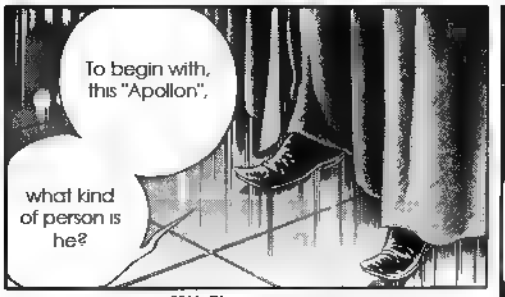
Second he seems to be gathering the source of life and power of a Zoalord
The Zoa Crystal.
First he has at least the same ability as the Zoalords.

"Apollon"
This is. ..



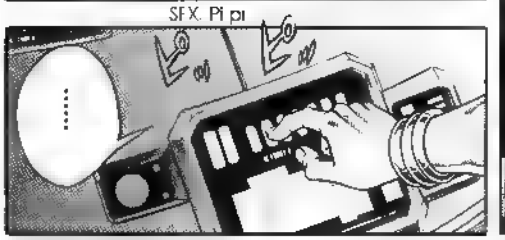
Kabra Khan's Crystal
also went missing.
During the Shinjuku incident, after escaping Draglord's body by a hair's breath, someone struck him down
Hmm...

!!
This may possibly have involved "Apollon"

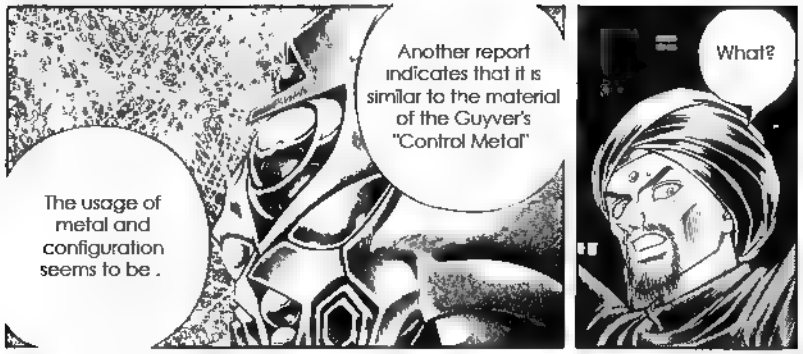


To begin with, this "Apollon",
what kind of person is he?

In time we might also encounter him...
I have a bad feeling about this.



SFX. Pi pi
.....



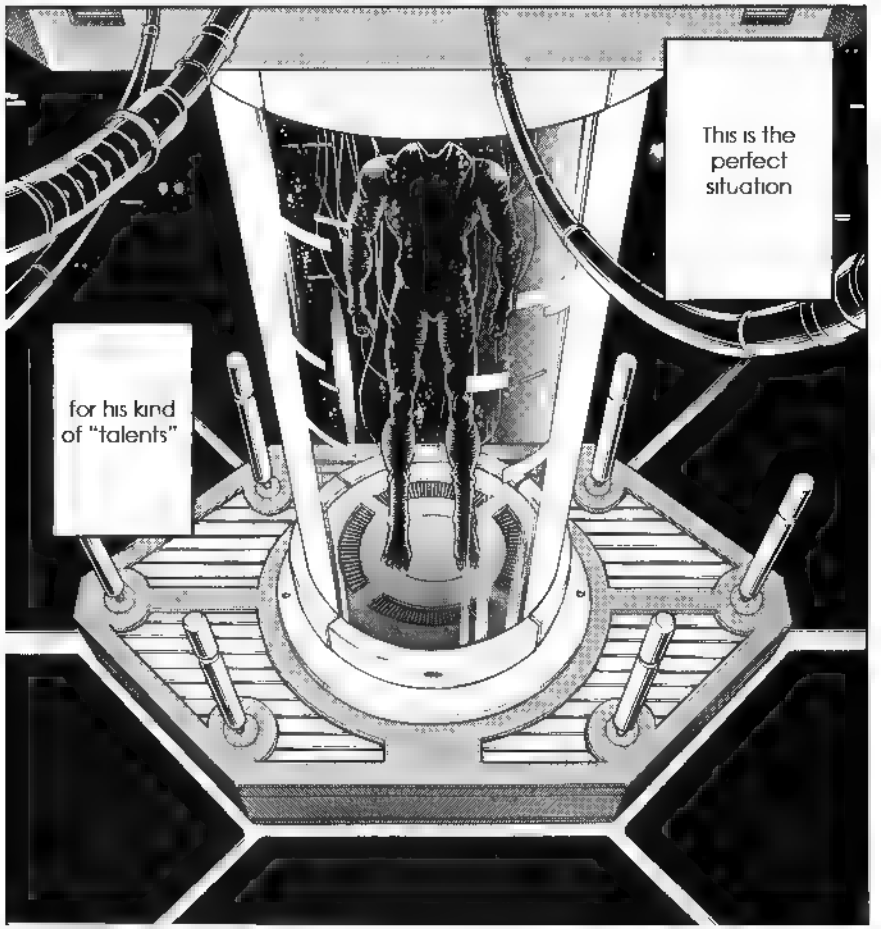
The usage of metal and configuration seems to be .
Another report indicates that it is similar to the material of the Guyver's "Control Metal"
What?

It can t be, "Apollon's" true identity is
Then this means.
Wh what was that!?

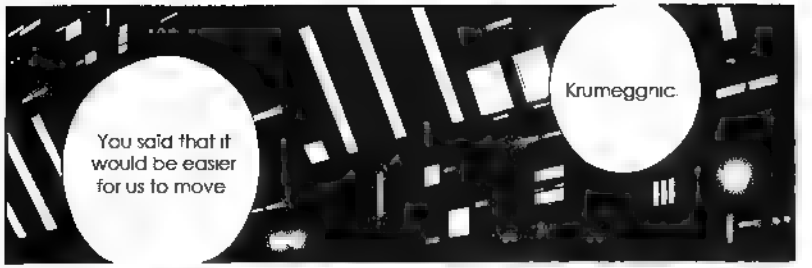
I don't know
Anyway, there is no mistake that he is a threat to us Zoalords.
The "Advents" ...

And third, the armor that he wears-
Analyzing it, the material composition does not exist anywhere on earth . this is certain

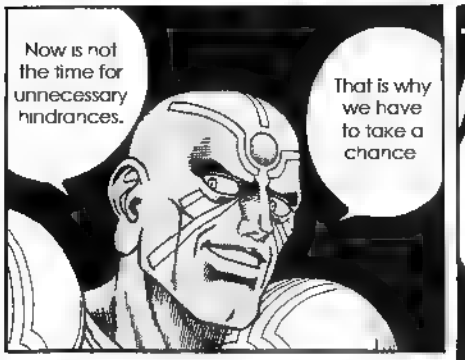
3 months ago in Shinjuku
didn't we pick up something interesting?



This is the perfect situation
for his kind of "talents"



You said that it would be easier for us to move
Krumeggnic

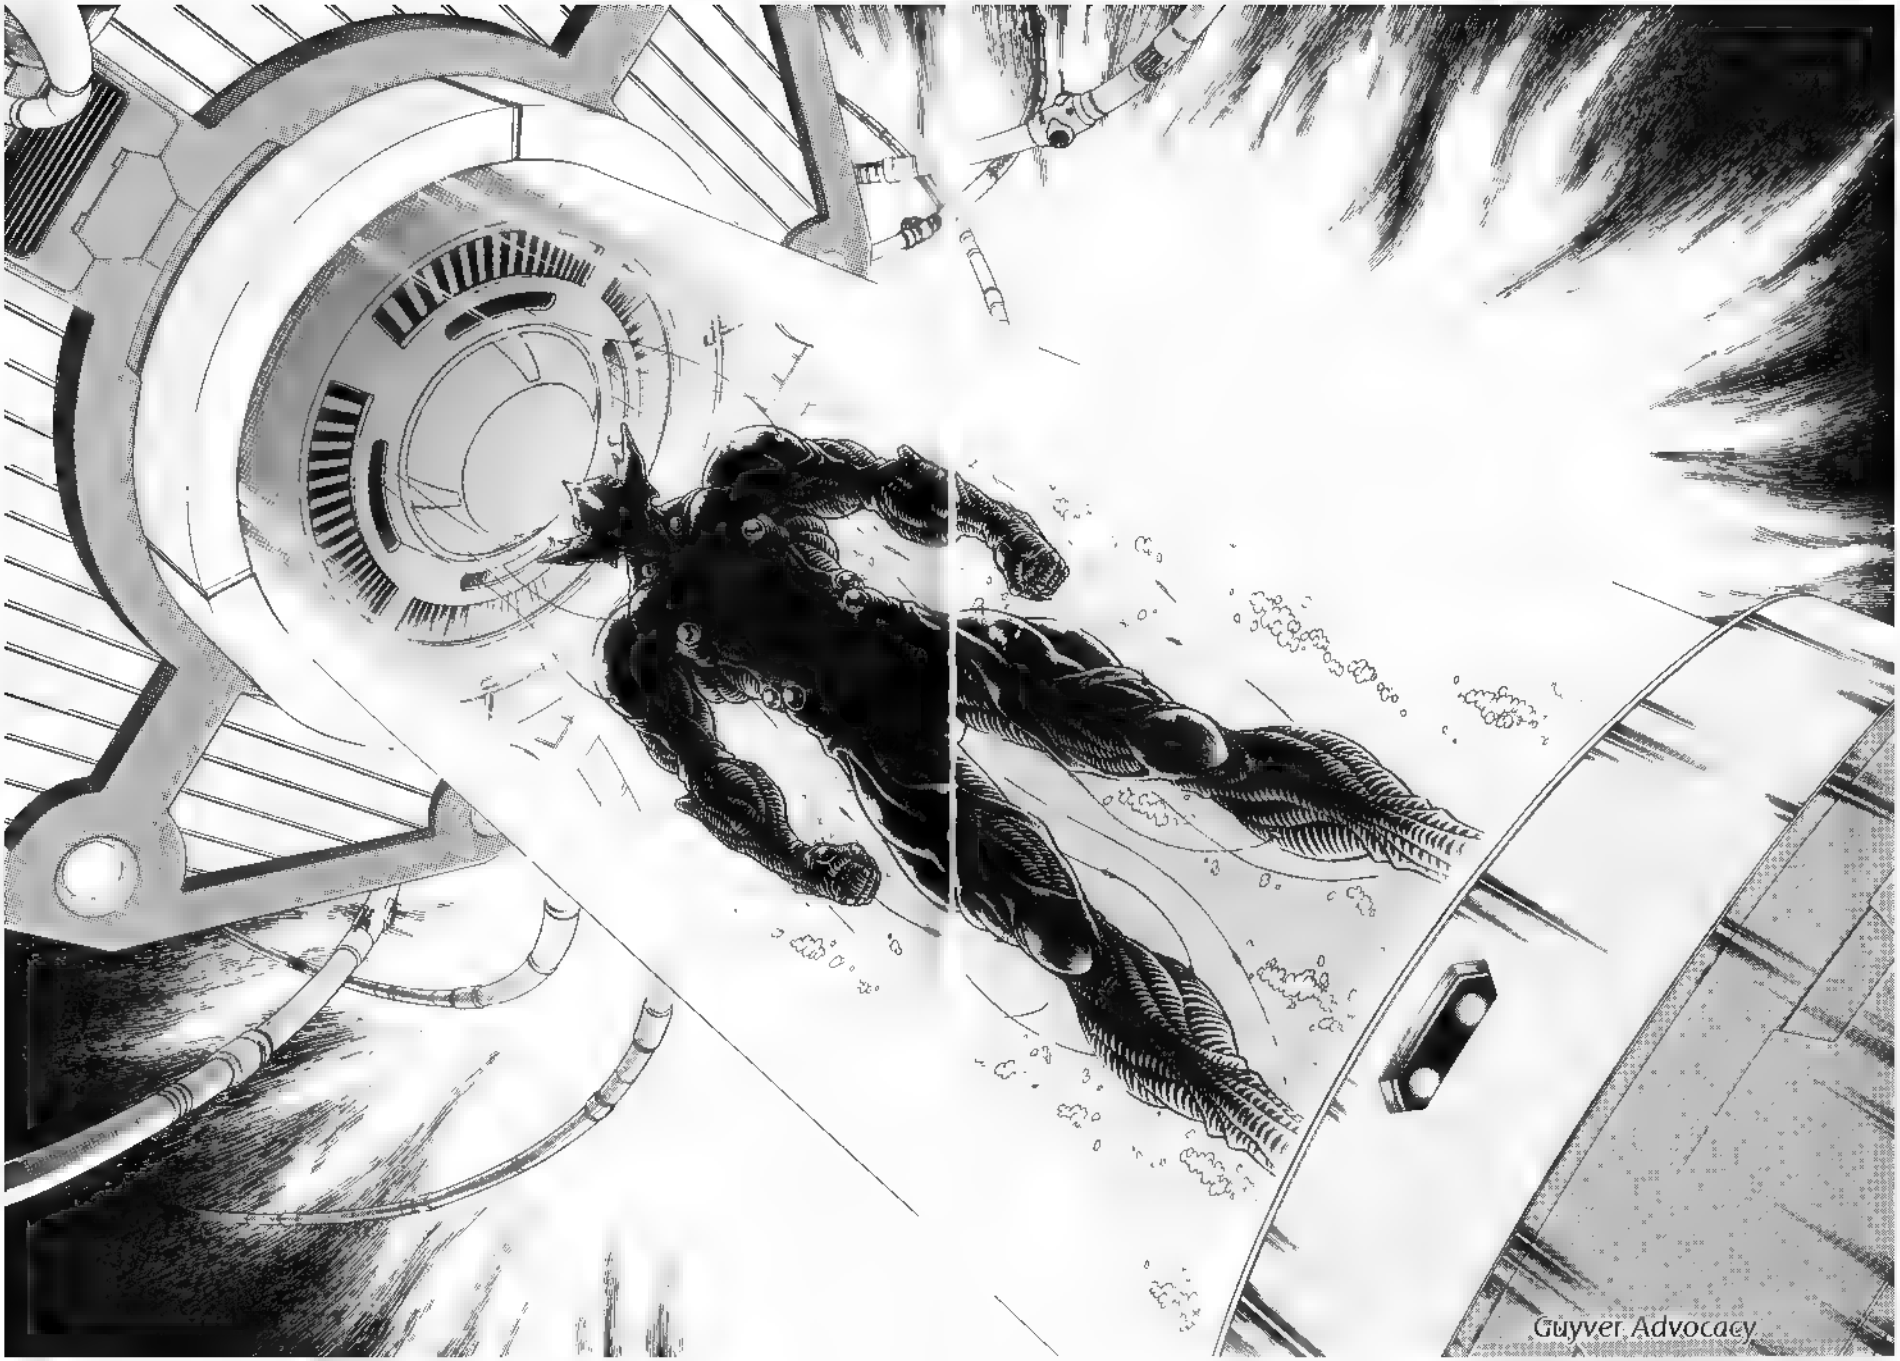


Now is not the time for unnecessary hindrances.
That is why we have to take a chance

But with this dangerous person out there
is it safe for us to move around?

But

?
There is no need for us to proceed ourselves.
Hehehe . even if I say "move"



Guyver Advocacy

SFX Juuaaaaa
Whatever he is scheming...
Besides...
We are in need of his skill

Are you saying to trust him?
It can't be!?
However
After his Zoa crystal was removed by Archanfel,
he had no power left
SFX Juuuuu
We've given him back some "Power"
Although not as comparable as before

In other words a "female" Guyver II.

There is something strange in her
The thing is...

Strange?

About the way
she named herself

It's not that I doubt you but

Must have a fair bit of experience
She's no amateur

I find it hard to believe
That a new "Bio-booster" has appeared.

However I saw it when she cancelled her "bio-boost"
There is no mistake
I felt the same as you.

He's just shy
Aptom?
Yeah.
You should have invited him in.
Exactly what kind of girl is she?

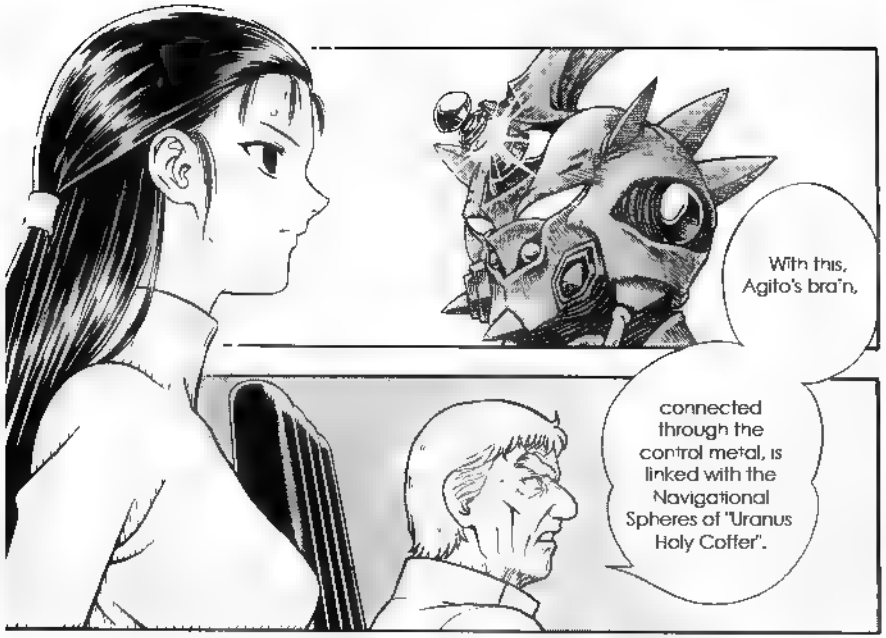
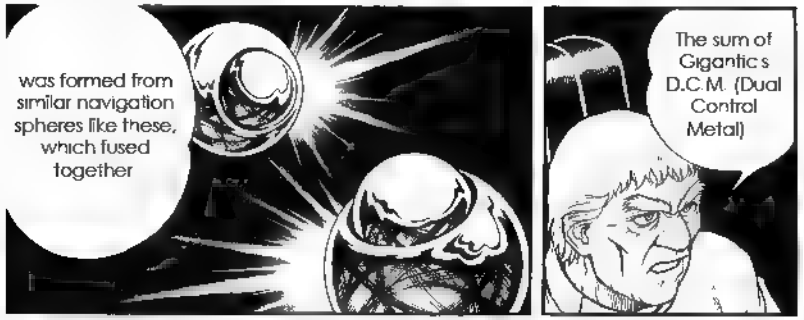
SFX Iiiiinnn
establishing a link to the memory of the "Uranus' Holy Coffer"
In theory, the Control Metal of Guyver III and the Navigational Spheres are
Master Agito

This is the information stored inside the Naviga-tional Spheres.
The Uranus Holy Ark contains tens of millions of years of memory...
Gaiyou Advocacy



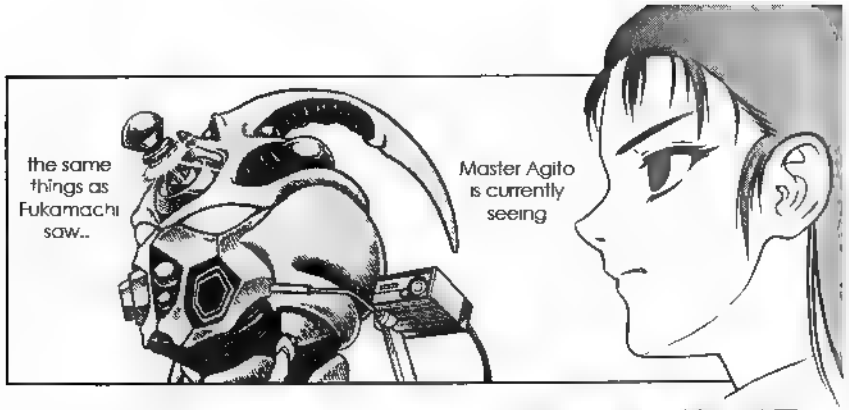
With this, Agito's bra'n,
connected through the control metal, is linked with the Navigational Spheres of "Uranus Holy Coffer".



was formed from similar navigation spheres like these, which fused together
The sum of Gigantic s D.C.M. (Dual Control Metal)

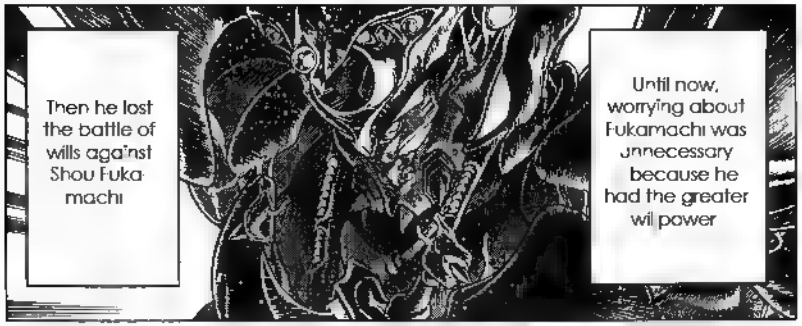
especially the large chunk of the past memories have been lost.
The functions of the Navi-gational Sphere,
However, in order to "control" all of the super weapons of the Gigantic, a lot of capacity had to be cut down.

Gyuiiii
Guyver Advocacy

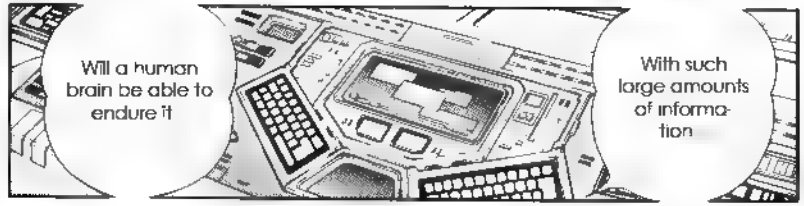


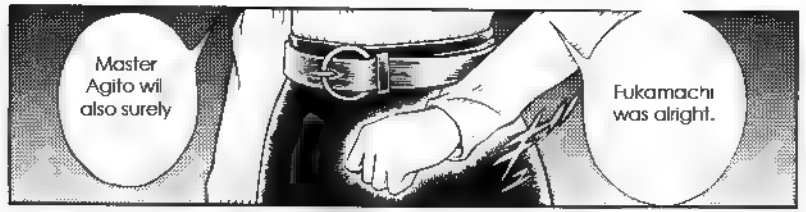
he lost the Gigantic "Trump Card' which was a great blow to his plans

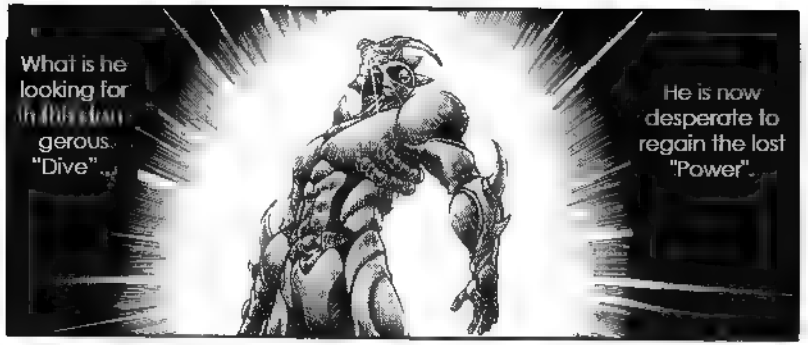
Although he retrieved the Navigationa Spheres from Arizona,



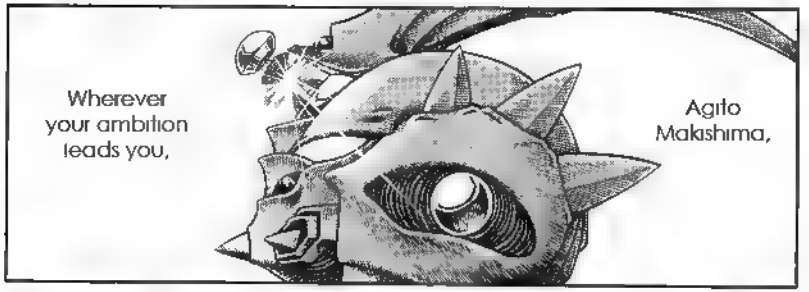
Then he lost the battle of wills against Shou Fukamachi
Until now, worrying about Fukamachi was unnecessary because he had the greater will power





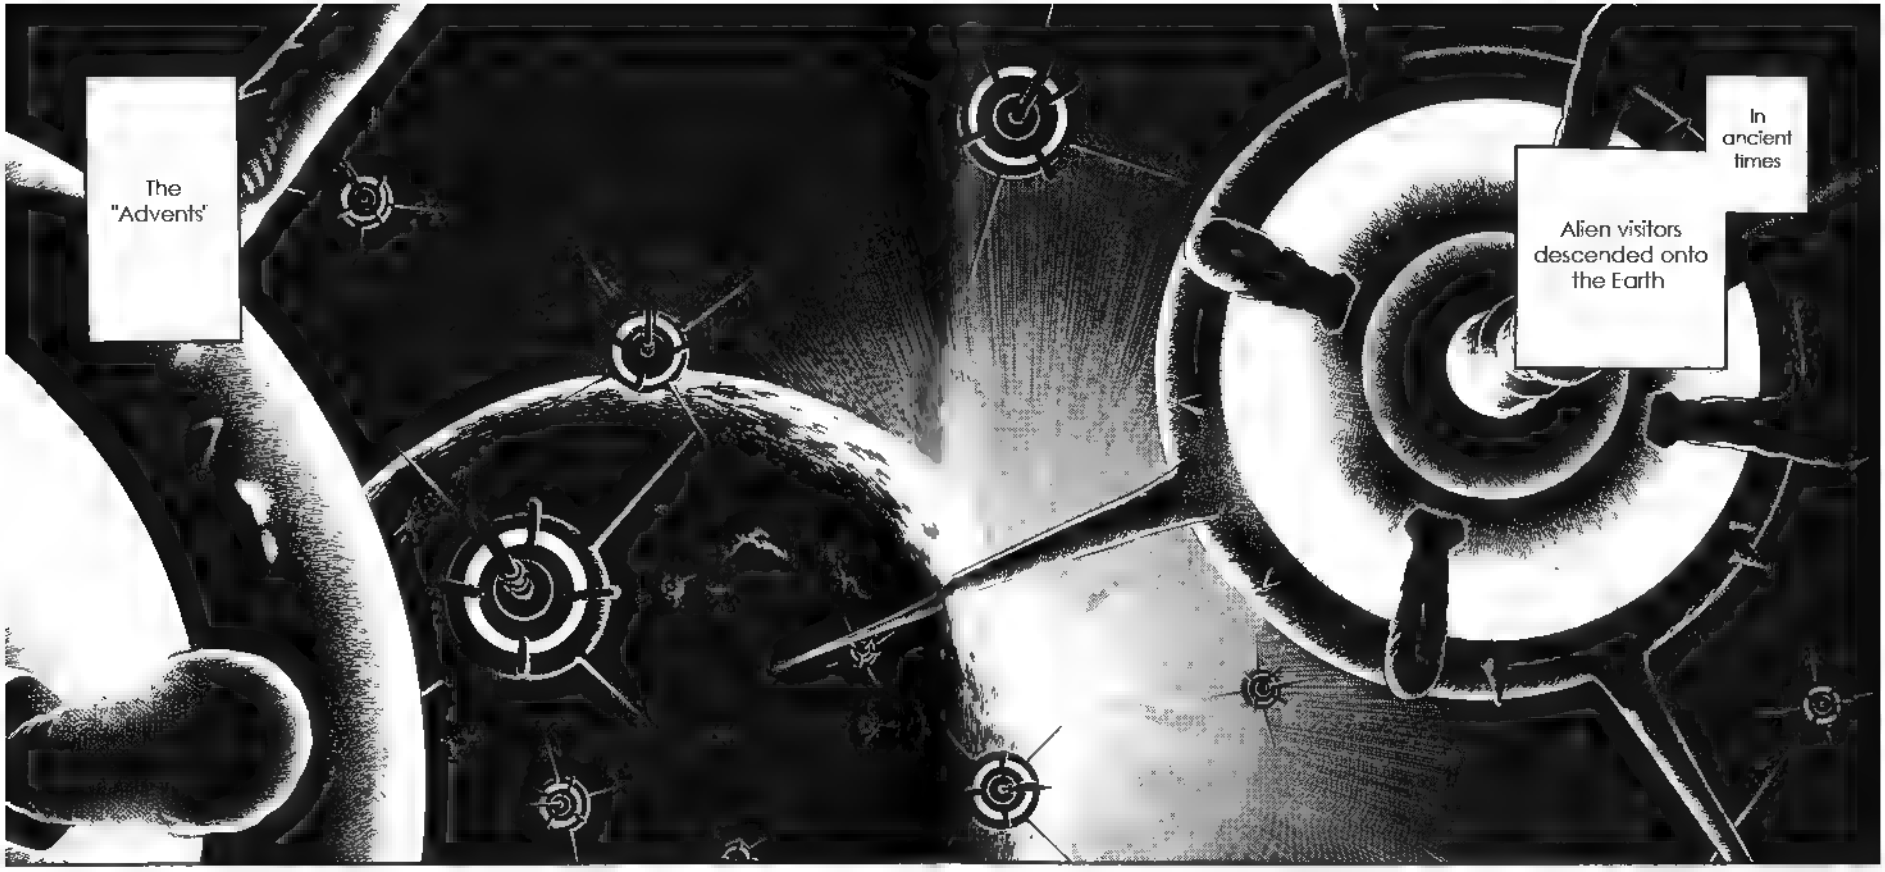


What is he looking for [illegible] gerous. "Dive"...
He is now desperate to regain the last "Power".

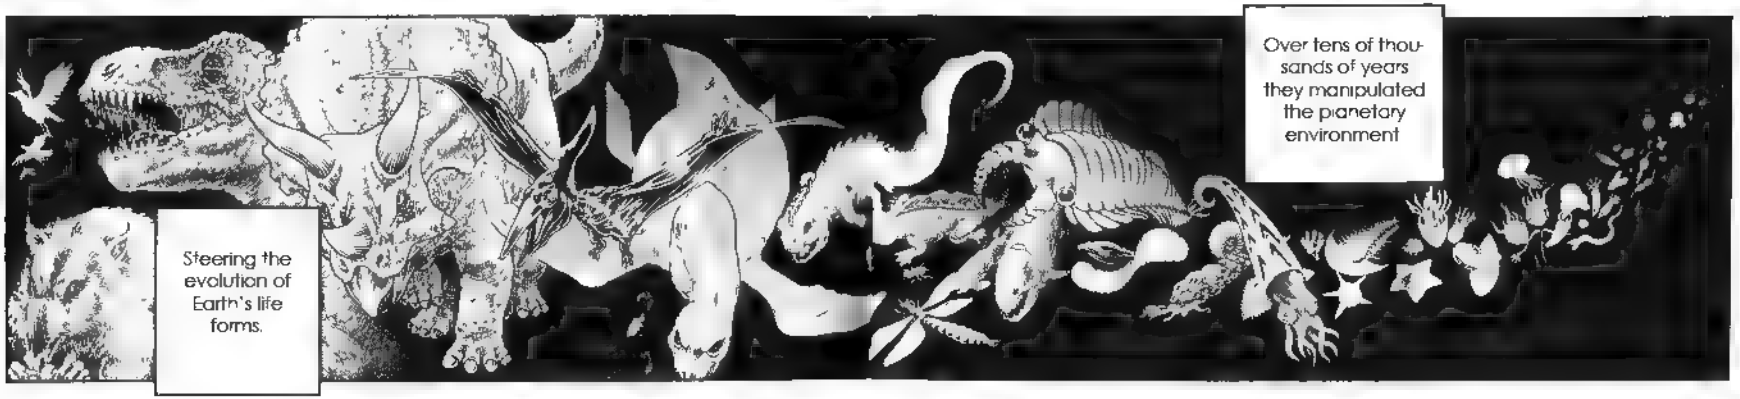


Wherever your ambition leads you,
Agito Makishima,

I will be watching.

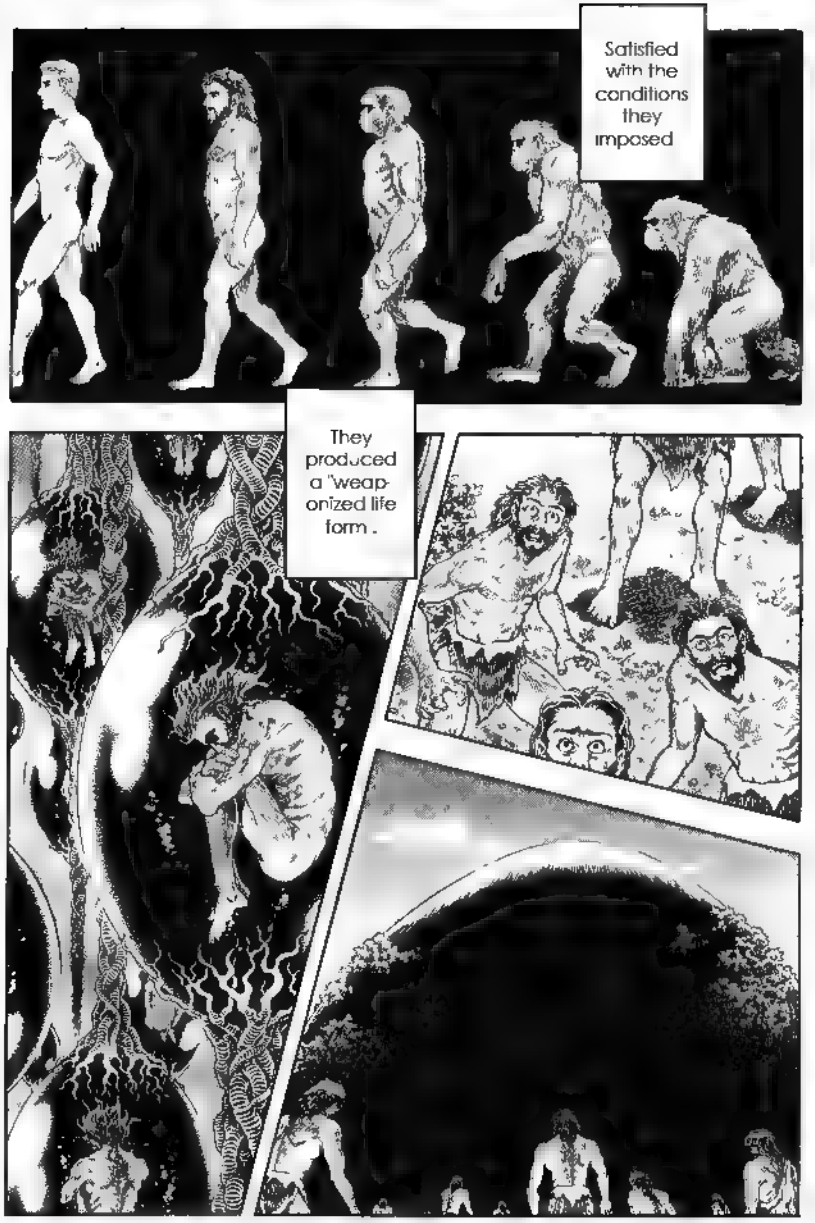


The "Advents"
In ancient times
Alien visitors descended onto the Earth

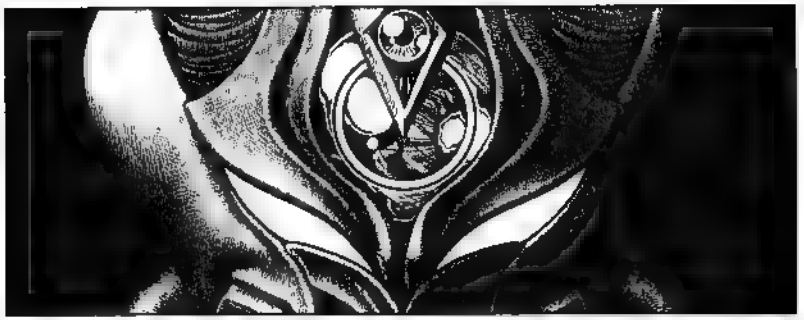


Steering the evolution of Earth's life forms.
Over tens of thousands of years they manipulated the planetary environment

Although we are both able to access the Gigantic's battle data...
Only Fukamachi was able to create the Gigantic..
Then somewhere in this vast memory...
s hidden the secret to the birth of the Gigantic
experienced this "Vision .
Once, Fukamachi also

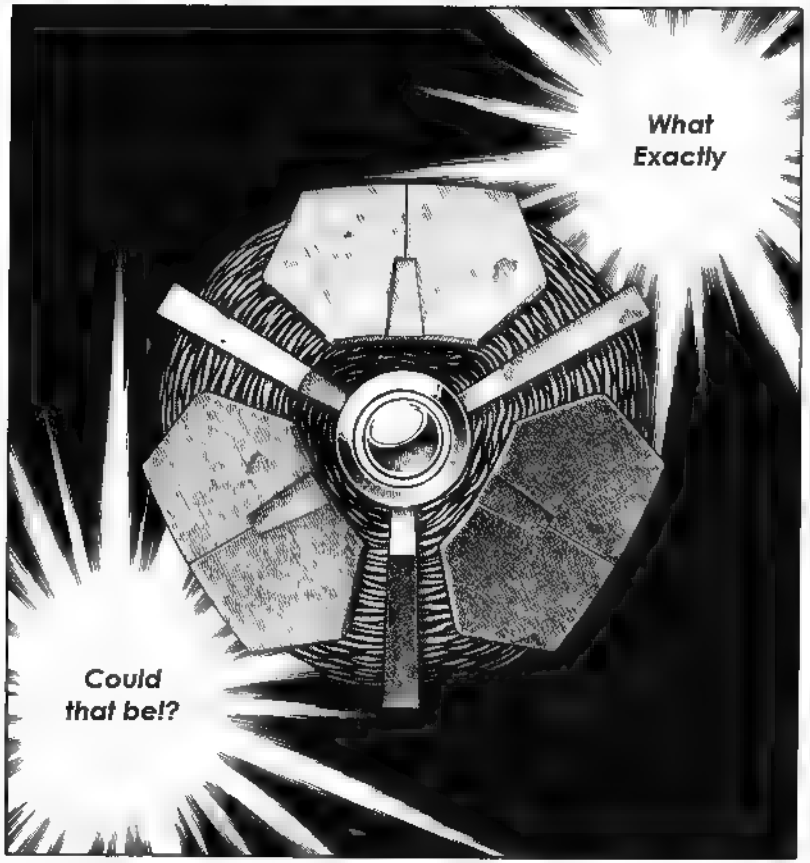


Satisfied with the conditions they imposed
They produced a "weaponized life form .

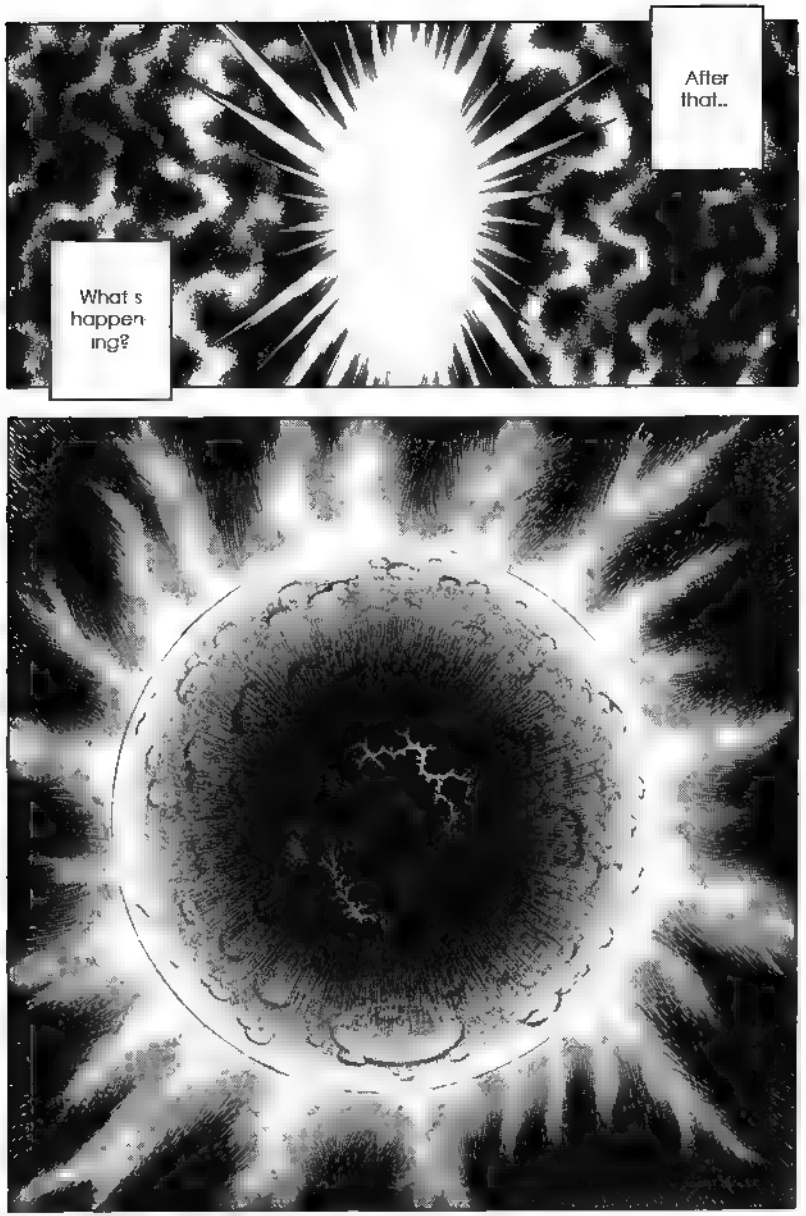


well, it starts from here

Something Fukamachi had that I did not.



What Exactly
Could that be!?



After that..
What s happen ing?

And was named "Guyver"
The "bio- boosted human" sur passed the experimental creatures
and possessed surprising destructive power
And then-
They discov- ered that a human with this power could not be controlled

What is this!?
!!

Master Agito!?
Oh no!!
Uwaaaaaah

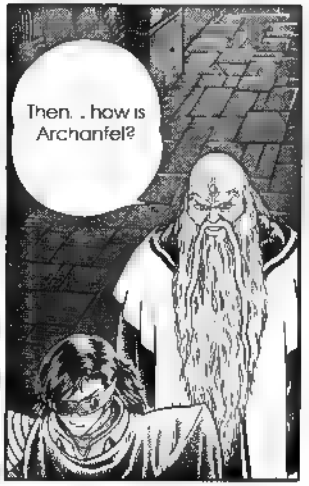
I thought it was about time that we see one another.
Imakarum Mirabilis
It has been a long time,

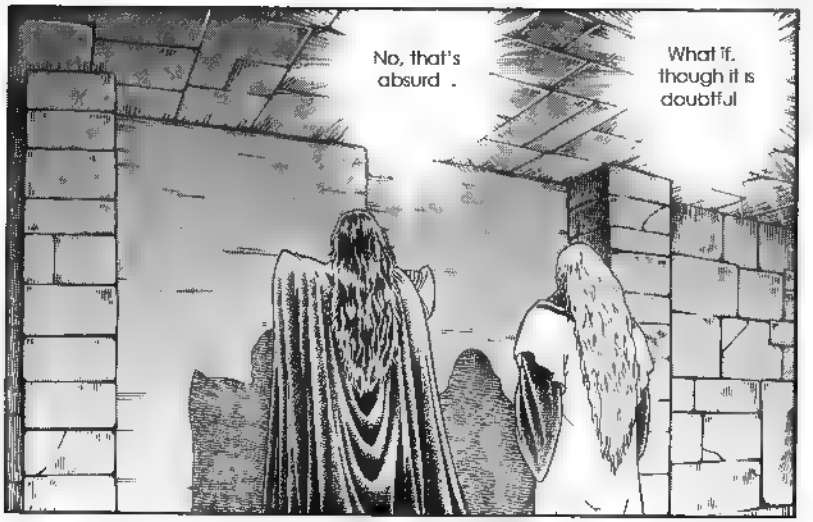
he has continued to sleep
Unfortunately in the past few months here



Then. . how is Archanfel?

I see

That we might not know how many years before he wakes up?
Could this possibly mean



There are intermittent short "sleeps".
These periods are gradually increasing and the intervals becoming narrow
Before long, the long years of sleep .. will lead to a "dormant season".

There is still much mystery to the "Sleeping sickness" that is troubling Archanfel.
Even I cannot understand the period of the cycles.

HYPER ZOANOID

GUSYPHUS

グシフォス

More than being a single combatant, it is a Hyper Zoanoid that specializes in leadership. It has a "Stealth" ability that cannot be detected by any kind of sensor, and also has the ability to deploy a dome type barrier in a wide area. The largest diameter of the barrier is 100m, and it uses it as an ability to trap the enemy inside the "cage".

Because deploying the barrier requires concentration, mobility is considerably reduced.

Already having battled Guyver I, is very similar to Hyper Zoanoid Zerbubuth. Was additionally processed to fight against Guyvers; the body has a special shell that renders High frequency swords and sonic buster ineffective. The right arm is equipped with a strong Living Laser Cannon, while the left arm is equipped with a "High Frequency Claw".

Not used yet, but the 3 head horns can shoot "Solution Liquid" similar to Zerbubuth.
